1.

***RESTRICTION***

Restriction to a single nucleic acid (selected from the group consisting of SEQ ID NO: 1-68) and a single pair of primers, corresponding to said nucleic acid is required under 35 U.S.C. § 121 and 372.

The inventions recited in claims 1-31 are inclusive of *E. coli* nucleic acids encoding antigenically distinct flagellin proteins. A 371 application is considered to have unity of invention only when there is a technical relationship among those inventions involving one or more of the same or corresponding technical features. The expression "special technical feature" means those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. In the instant application, the linking technical feature of each invention is an *E. coli* nucleic acid encoding a flagellin protein. However, *E. coli* nucleic acids encoding flagellin proteins were known in the art at the time the invention was made, as exemplified by the teachings of Tominaga et al and Fahrner et al (references 'A2' and 'A3', respectively, in the IDS filed March 19, 2001). Thus, there is no special technical feature linking the recited groups, as would be necessary to fulfill the requirement for unity of invention. Furthermore, each of the recited primer pairs is distinct over each other. The primers are structurally and functionally distinct since they consist of a unique nucleotide sequence and have different functions (i.e., the primer pairs amplify distinct regions of the nucleic acids encoding the antigenically distinct flagellin proteins). It is noted that while the generic claims will be examined for their full scope, claims drawn to specific nucleic acid sequences will be examined

only with respect to the elected nucleic acid and corresponding set of primers for amplifying that nucleic acid.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

2. In response to this Office action, **Applicants are required to amend the specification so as to identify each sequence recited using the assigned SEQ ID NOs**, as required under 37 CFR §1.821(d). See for example, Tables 3A, 3B, 8, 8A, 9 and 9A and claims 12, 16, and 24.
